Do's and don'ts of good scooter care.

- **DO** charge Batteries for at least 8 hrs, **EVERY NIGHT AFTER USE**, and if possible the night before use.
- **DO** charge your scooter overnight at least once per week when not in use.
- **DO** make sure the scooter key is turned **OFF** before plugging in the charger
- **DO** make sure the charger is powered **OFF** when plugging in and unplugging the scooter
- **DO** make sure the scooter is well protected from the weather
- **DO** drive slowly through puddles (no more than 20mm deep)
- **DO** keep the scooter clean
- **DO** have the scooter serviced regularly
- **DO** keep the tyres at the recommended pressures (between 20 to 30 psi)
- **DO** let us know if any fault seems to be developing
- **DO** be sensible and reasonable in what you expect your scooter to do
- **DON'T** turn the key off whilst the scooter is moving except in an emergency
- **DON'T** lean heavily on the steering column when getting on or off
- **DON'T** drive fast when on rough ground
- **DON'T** drive fast when going up or down a kerb or any other kind of bump
- **DON'T** overload the scooter with heavy loads or heavy accessories
- **DON'T** allow anyone unauthorised to repair, adjust or service your scooter, damage could be caused which could void your **Warranty!**
- **DON'T** drive on the beach, in water or through deep dry sand

- **DON'T** change from Freewheeling Mode to Drive Mode while the scooter is still moving
- **DON'T** rapidly accelerate or decelerate when unnecessary to do so
- **DON'T** let children play unsupervised with the scooter
- **DON'T** let someone much heavier than yourself use the scooter
(unless you are sure it is designed to take their weight)
